# Introduction

## Overview

The purpose of these guidelines is to explain the use of the new brand style and to reinforce consistent application of the visual elements in all communications. This includes publications, presentations, and all other marketing materials both online and offline. Guidelines on the use of the logo are included.

## Your new “identity”

Your corporate identity is the face and personality presented to the global community. It’s as important as the products and services you provide. Your identity is the total effect of your logos, products, brand names, trademarks, advertising, brochures, and presentations—everything that represents you.

Because the brand cannot be compromised, we’ve created this guide to provide all the pertinent specifications you need to maintain its integrity. The guidelines set in this document are not meant to inhibit, but to improve the creative process. By following these guidelines, the materials you create will represent your company cohesively to the outside world.

# Colour Scheme

Accurate reproduction of the brand colour scheme is essential in communicating a clear and consistent message about the company image.

The Pantone colours should be used wherever possible, with CMYK / RGB being matched as closely as possible depending on the materials and print process.

Black and white are acceptable as accent colours, in addition to the colours within the assigned scheme.
